

A message from the Mayor & Los Angeles City Council

It's important that government works for you. The MyLA311 system means you just need to call one number to get help from City Hall. Our representatives are specially trained to help fix problems and provide information. No one knows more about what our neighborhoods need than you do, so we urge you to call 3-1-1 whenever you see graffiti, a pothole, a broken street light -- anything that needs attention. Fixing problems early saves taxpayer dollars and protects our neighborhoods.

And remember, you can also send an email to 311@lacity.org, visit myla311.lacity.org, or use the MyLA311 mobile app to contact your City anytime, anywhere.

The Mayor and City Council members support using MyLA311 services to submit requests for services listed here and much more, as well as to find out helpful information about City services to learn how your City can serve you better.

Visit this directory on the City website for details about your elected officials, as well as contact information lacity.org/directory
